**Hannah Solar Government Services to Build Solar PV
Array for Z Man Fishing Products, Inc.**

Summerville, SC- Hannah Solar Government Services has been selected to design and construct a 490kW roof mounted solar PV (photovoltaic) system for Z-Man Fishing Products, Inc. in Ladson, South Carolina.

Z-Man Fishing Products is a South Carolina based fishing lure brand that supplies products to fishermen around the world. Z-Man is one of the fastest-growing lure brands in the United States, sold nationwide in stores such as Bass Pro Shops, Walmart, and Dick's Sporting Goods. Their facility in Ladson, SC is responsible for all of Z Man's manufacturing.

The solar PV energy system being constructed is estimated to generate 654,006 kilowatt hours (kWh) of energy in the first year for Z Man's facility. This will allow Z Man to produce around 71% of their facility's electricity using their solar energy system.

HSGS is a veteran-owned business leading the way in global energy security by designing and building renewable energy and microgrid systems. HSGS specializes in project development, design, installation, and maintenance of commercial and utility scale solar PV systems energy storage for government, commercial, and utility clients. HSGS's breadth of experience includes projects that span the continental United States as well as overseas.

Col (RET.) Dave McNeil, President and CEO of HSGS, said "We are excited to start work on this energy savings project with Z Man Fishing Products. Z Man is a local business that is setting a great example of how businesses in South Carolina can advance their operations through renewable energy."
