Yosemite National Park Preventative Maintenance for 672 kW Solar PV System

El Portal Maintenance Complex, El Portal, CA

Hannah Solar Government Services (HSGS) was selected by the National Parks Service to perform the one time preventative maintenance on 672 kW's of solar located on 10 carports, 2 sloped concrete building walls, 3 free-standing concrete walls, and one roof array located at the El Portal Maintenance Complex in California's Yosemite National Park. The preventative maintenance HSGS conducted includes: performance tests, module cleaning, and visual, mechanical, and electrical inspections on the inverters, combiners, sub-combiners, and solar modules.

About Hannah Solar Government Services: Hannah Solar Government Services (HSGS) is a Service Disabled Veteran Owned Small Business specializing in the project development, design, installation, and maintenance of commercial and utility scale solar PV systems and electric vehicle charging stations for government, commercial, and utility clients. All solar PV systems are designed by an in-house engineering team and installed by NABCEP certified solar PV installers.
